

ANNUAL PLANNER

(2022-23)

CLASS – PRE PRIMARY

The early years of childhood constitute the most significant period of life, because this is when the foundations are laid for motor, sensory, cognitive, language, social and personality development. The Early Childhood Education Curriculum is a wide range of activities designed to assist the overall development of children.

We often think of curriculum as to what is being taught in the class room i.e. a list of subjects and a set syllabus but this definition of curriculum is not appropriate for Nursery and Pre-Primary classes. These children are learning while playing, eating and even during washroom time. So every part of the school day is planned to help the children learn and develop intellectually, physically, socially and emotionally.

We have designed an innovative curriculum for Pre-Primary with an objective of reinforcing concepts, ideas, skills and activities.

We have broadly devised an Annual Programme and some of the suggested activities to help your child achieve the learning objectives set up for Class Pre-Primary. For exact details you may refer to the Monthly Plan.

I. LANGUAGE SKILLS- The main goal of the language curriculum is to child to communicate with other people.

There are four major skills that a child should have in order to communicate.

VI. EVALUATION – Research has shown that tests are not accurate when measuring children's abilities as they do not understand the concept of testing. We cannot compare one child's score with another. Children develop at different rates therefore we have no formal tests. Teacher measures children's progress by ongoing observations over the whole year. A child's progress is compared to his / her previous development and not to other children. The child's progress will be recorded by:

1. Anecdotal Record
2. Check List
3. Collection of work
