

White Cane Safety Day

White Cane Safety Day was celebrated in D.A.V. Public School Kailash Hills on 15th October 2019, Videos and other interactive activities were used to sensitise students towards challenges faced by blind / visually impaired persons and the significance of the white cane as a tool of independence for them. Students were made to slip into the shoes of a blind person by blind folding their eyes & asked to perform common tasks like moving through the room , sensing the objects in surroundings etc. Students thus realised the significance of sound and touch for a visually impaired person. Participating students acknowledged the need to have a friendly and respectful attitude towards the fellow visually challenged humans and also the requirement of disabled friendly infrastructure in all public transport etc. to be a truly inclusive society for all.
