

PHOTOVOLTAIC TRENDS

In today's world, tapping on to renewable sources of energy is the need of the hour. Encouraging the children to identify and value alternative renewable sources of energy, thus, is of prime importance. This project - Photovoltaic Trends - aimed to study about solar energy available to different countries across the world. Children attended a symposium on the Increasing Need for Solar Power, designed presentations, posters, and "Green Home" models. An essay writing competition was also organised, and children were taken around the school campus to see and understand the working of solar panels installed in the school.

RESULTS FOR ESSAY WRITING COMPETITION

TOPIC: GO GREEN – RENEWABLE SOURCES OF ENERGY

RANK	NAME	CLASS & SECTION
1 ST	PIYUSH GARG	IX D
2 nd	DIVYA VERMA	IX B
3 rd	ROHIT BHARDWAJ	IX D
