

Touristy Tales

Over the past few years, the Tourism industry has seen a major rise, globally. But with such a rise, along with a strengthened economy, comes a major challenge of deteriorating environment. Sustainable tourism or Eco-tourism has evolved as a solution to such concerns. This project - Touristy Tales- focussed on sustainable tourism and it's impact on developing nations including China, Thailand, Hong Kong, Malaysia and Singapore. Children prepared scrapbooks, files, brochures and travel itineraries for their favourite travel destinations and learned about Eco-Tourism. Annual exhibition - Navorja also displayed the work of our children.
